SKILLS

Front End: React JS, Redux, Hooks, jQUERY, JavaScript ES6, CSS3, Bootstrap 4, AXIOS, HTML, Yarn

Front End Tooling: Cypress

Web Service: C#, .Net Core, ADO.Net, .Net, MuleSoft, Entity Framework Core

Back End: T-SQL, SQL Server

Back End Tooling: Swagger, Postman, X-Unit

Cloud Tools: Netlify, Azure

EXPERIENCE

Software Engineer | WKS Restaurant Group

May 2022– Present

- Created secure RESTful API services connecting client and server-side resources.
- Implemented SQL Server stored procedures to be executed using EFC from the web service.
- Converted designs/prototypes into pixel-perfect, fully functioning and maintainable code for various devices and platforms using CSS and MUI.
- Used Redux for state management and React JS to produce custom components.
- Using Azure functions, built an endpoint that would perform a daily sync to keep Google Products, such as Google Directory and Gmail, up-to-date using Google APIs for 10,000+ employees.
- Using Azure functions, built an endpoint that would perform a daily sync to ensure that our restaurants had uniform settings and demographic information on Zoom.
- Drove our daily stand ups, ensuring that we remained focused and decreased our meeting times from 2 hours to 30 minutes.
- Provided technical support to over 300+ restaurants by answering email inquires and addressing bugs found by users.
- Built functional tests using X-Unit to streamline our testing efforts.
- Consolidated our email templates by refactoring redundant code and by setting a uniformed email layout.

Application Developer I | CO-OP Financial Services

August 2021– April 2022

- Developed a microservice with 25+ endpoints using .NET Core connecting client and server-side resources to save business resources and cost, to support and streamline business operations, while providing added security to the end user.
- Connected the front-end to the web server using Axios to make API calls.
- Presented new features to developers, product managers, and QA team.
- Identified and resolved problems uncovered by testing, automated, and feedback.
- Used Postman and Swagger to test applications.
- Built complex transformations using DataWeave in Anypoint Studio.
- Enhanced, troubleshoot, and maintained existing applications in MuleSoft.
- Engaged in the development of MuleSoft service endpoints using Anypoint Platform to reverse a credit card transaction and repost as a loan.
- Built out custom components on the front end using React, Hooks, and Redux.

EDUCATION

Sabio | Web Development, Computer Science 2019

University of California, Riverside | Bachelor of Science, Anthropology 2012-2016
